Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 October 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

The amendment filed on October 9, 2003 have been received and entered into the application.

Applicants' arguments with respect to claims 25, 27 and 29-33 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 33 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 33 is indefinite since it is contradicting the claim which it depends from. It is noted that claim 33 is depend on the claim 32 which recites "consisting essentially of" only the mixtures of conjugated estrogen compounds and non-aromatizing androgenic compounds. The broader "comprises" contradicts narrower "comprising essentially of".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1617

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 25, 27, 29-31 are rejected under 35 U.S.C. 102(a) as being anticipated by Martin et al. (WO 00/74684A1).

Martin et al. teach Applicants' pharmaceutical composition comprising estrogenic compound including conjugated estrogens set forth in claims 25, 29 and 30, non-aromatizing androgenic compound set forth in claims 25, 27 and 30 and progestin compound set forth in claims 25 and 31 for treating postmenopausal and perimenopausal or symptoms of estrogen deficiency in women. (abstract, page 1, lines 28, page 2, lines 9-12, page 3, line 13- page 4, line 22, page 6, lines 17-31, page 7, line 19-page 8, line 9, page 9, line 13-14, pages 19-20, claims 1-7).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 1617

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 32 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over KAKEN PHARM CO LTD (KAKEN) of record in view of Borah et al. (EP 0322020).

KAKEN teaches on the abstract that the composition comprising estrogen compounds set forth in claim 33 such as estrone, estradiol and/or conjugated estrogen, and non-aromatizing androgenic compounds including oxandrolone, oxymetholone and stanozolol useful for maintaining or increasing bone density without side effects.

KAKEN does not teach the specific conjugated estrogens set forth in claim 32.

Borah et al. teach that conjugated estrogen set forth in claim 32 is useful in a pharmaceutical preparation for the treatment of osteoporosis. (abstract).

It would have been obvious to one of ordinary skill in the art to modify the composition of KAKEN and utilize specific conjugated estrogens set forth in claim 32 because KAKEN teaches that conjugated estrogens in general are useful in KAKEN composition for the treatment of osteoporosis and the specific conjugated estrogens set

Art Unit: 1617

forth in claim 32 are generally utilized and useful in a pharmaceutical preparation for the treatment of osteoporosis. One would have been motivated to make such modification in order to achieve expected benefit of treating osteoporosis to maintain or increasing bone density without side effects as taught by KAKEN.

Absent any evidence to contrary, there would have been a reasonable expectation of successfully treating osteoporosis by KAKEN composition as modified by Borah et al. to maintain or increase bone density without side effects.

For these reasons the claimed subject matter is deemed to fail to patentably distinguish over the state of the art as represented by the cited references. The claims are therefore properly rejected under 35 U.S.C. 103.

None of the claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1617

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
